

PRODUCT RELEASE NOTE

Version	1.1.11.1	Server	Production
Date of Release	28-Feb--2025	Release No	1.0
HIGHLIGHTS			
Automate invoice dispatch and reminders	Automatically email invoice pdfs on generation, send customers reminders of upcoming due dates and past dues.		
Enhancements	Minor enhancements.		
Bug Fixes	Minor bug fixes.		
NEW FEATURES			
Automate invoice dispatch and reminders	Automatically email invoice pdfs on generation, send customers reminders of upcoming due dates and past dues.		
ENHANCEMENTS			
Contract Details	Select item displays all items for the asset type / item type		
Inventory Master	Item type has been added to inventory master. Item master has the same values as asset type		
Notifications	Email invoice notification requires generate Invoice pdf on party details to be set		
BUG FIXES			
Notification	Past due notification displays invoice amounts due but not paid. Invoice amounts split out line and tax. Due date notifications displayed amounts due in the future based on parameters setup on party notifications		
Contract Details	Asset description saved as not it is linked with inventory item. Payment amount can be entered for step payments without scrolling.		
Party	Consolidate invoice option removed as this is future functionality. Tooltips added to Pre Bill Days and Generate Invoice pdf fields		
Inventory Register	Fixed and optional fields available		
Processing	Full program name displayed in Process View		
Report > Accounting Entries	Creation date and transaction date is displayed on report		
KNOWN ISSUES
